WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/US04/31304

Box No. I Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of:

- ☒ the international application in the language in which it was filed
- ☐ a translation of the international application into _____, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).

2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

- ☐ a sequence listing
- ☐ table(s) related to the sequence listing

b. format of material

- ☐ on paper
- ☐ in electronic form

c. time of filing/furnishing

- ☐ contained in the international application as filed.
- ☐ filed together with the international application in electronic form.
- ☐ furnished subsequently to this Authority for the purposes of search.

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

4. Additional comments:

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.
PCT/US04/31304

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)

Claims 20-45 YES

Claims 1-19 and 46-48 NO

Inventive step (IS)

Claims 20-45 YES

Claims 1-19 and 46-48 NO

Industrial applicability (IA)

Claims 1-48 YES

Claims NONE NO

2. Citations and explanations:

Claims 1-19 and 46-48 lack novelty under PCT Article 33(2) as being anticipated by Yang et al (U.S. 6,258,121).

Note in figures 1-3, a stent (10) can be coated with hydrophobic and hydrophilic or with any material as claimed and also, capable of using the method steps as claimed in claims 46-47, for coating stent (10).

Claims 20-45 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest a plurality of flanges define apertures there through and the connector having a crossing member and a plurality of leg members extending from the crossing member.

Claims 1-48 meet the criteria set out in PCT Article 33(4), and thus the stent device industrial applicability because the subject matter claimed can be made or used in industry.
